

GIS-NET Measurement Guide

February, 2009

To determine if a property is within 500 feet of the freeway, the applicant shall use the Los Angeles County GIS-NET website found at:

<http://planning.lacounty.gov/gisnet>

1. Accept the terms
2. Click on Search
3. Key in Parcel ID (APN number) – follow the example
4. Click on Layers (top left corner) on main page.
5. Select Ortho Aerial Imagery folder and then select Imagery 2006 and click Refresh Map on main page.
6. Use the Zoom+ function to enlarge the map to desired size or use Quick View option to select a location.
7. Click on Advance View (top middle), click on the red tool box to open it and select Measure Distance (ruler icon).
8. Click on a point on property line closest to freeway and then click on the edge of the closest traffic lane of the freeway.
9. The distance will be displayed in a panel on the right side of the aerial map.

Accuracy is within 1.5 feet with a 95% confidence level.
